

Energy Policy Statement

Declaration of Commitment

As part of its environmental strategy, FP McCann is committed to responsible energy management and will practice energy efficiency throughout all its premises, plant and equipment, wherever it is cost-effective to do so.

Policy

The Policy of FP McCann is to control energy consumption in order to:

- avoid unnecessary expenditure
- to improve cost- effectiveness, productivity and working conditions
- protect the environment, and
- prolong the useful life of fossil fuels

Objectives

FP McCann's long term objectives are to:

- buy fuels at the most economic cost;
- burn and use fossil fuels as efficiently as practicable enabling future generations more time to research alternative energy sources;
- reduce the amount of pollution, particularly CO₂ emissions, caused by its energy consumption;
- reduce, wherever possible, our dependence on fossil fuels through the use of ambient and renewable energy;
- reduce the loss of energy from its buildings to the minimum practical level

Accountability

- Safety, Health & Environmental Committee to encourage employee awareness and liaise with Senior Management for support to meet the requirements of the Energy Policy.
- The Energy Manager to ensure:
 - that information and advice is available on all aspects of energy management
 - that all energy supplies demonstrate good value for money
 - that energy awareness is encouraged in all staff and employees
 - that all aspects of energy waste are investigated and rectified if avoidable
- Staff and employees to be made aware of the cost of energy directly under their control to encourage good housekeeping practice.

Review Procedures

- Energy Manager to submit a report on the achievement of energy targets and any energy saving projects undertaken.
- Reports to be submitted to the Senior Management Team at Management Review meetings.

The Energy Manager will produce regular reports showing energy usage against agreed targets where adequate metering is available. The results will be discussed with users and where necessary they will be given recommendations for reducing energy demand.
